

Nil Lad

AI/ML Student & Full-Stack Developer

+91 7359986990 | ladnil03@gmail.com | Gujarat, India | github.com/ladnil03 | kaggle.com/nillad

SUMMARY

4th-semester B.Tech AIML student with hands-on experience building production-grade full-stack web applications and machine learning systems. Passionate about bridging AI research with practical engineering — from explainable ML models to containerized microservices. Self-driven builder with 7 end-to-end shipped projects spanning healthcare AI, HR automation, content generation, recruitment automation, and mobile-first business tools.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning (AIML)

2024 – Present

4th Semester Gujarat, India

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart, HTML, CSS
Frontend: React, Next.js, Flutter, Tailwind CSS, Vite, Framer Motion, GSAP
Backend: FastAPI, Flask, JWT Authentication, REST APIs, Docker Compose
Databases: MongoDB
ML / AI: XGBoost, Scikit-learn, SHAP, Sentence-Transformers, Groq API, ElevenLabs API, Whisper
DevOps / Tools: Docker, Nginx, Git, GitHub, FFmpeg, Netlify
Interests: Building AI-Powered Applications, Data Science Competitions, Open Source Development

PROJECTS

Dayflow — Full-Stack Attendance Management System

Built a full-stack attendance and leave management platform with React, FastAPI, and MongoDB, featuring JWT auth, role-based dashboards, real-time check-in/check-out, and CSV reporting workflows.

Stack: React, Vite, Tailwind CSS, FastAPI, Pydantic, MongoDB, JWT, Docker, docker-compose, nginx.

Heart Disease Prediction — ML-Powered Risk Assessment Platform

Developed an end-to-end ML web app that predicts heart disease risk using XGBoost and explains outcomes with SHAP, with FastAPI endpoints, MongoDB persistence, and automated PDF report generation.

Stack: Python, XGBoost, scikit-learn, SHAP, FastAPI, Pydantic, ReportLab, MongoDB, HTML, CSS, JavaScript.

Personal Portfolio Website — Story-Driven Interactive Portfolio

Created a story-driven interactive portfolio website with chapter-based scrolling, custom React hooks, animation-rich UI elements, and fully responsive deployment-ready architecture.

Stack: React, Vite, Tailwind CSS, React Router, Radix UI, Lucide Icons, Netlify.

Vidsnap AI — AI-Powered Video Reel Generator

Engineered an AI-assisted reel generator that converts text to voice and combines uploaded images into 1080x1920 MP4 videos through an automated background processing pipeline.

Stack: Python, Flask, Jinja2, ElevenLabs API, FFmpeg, background worker scripts.

Metis Hire — AI-Powered Recruitment Platform

Built an AI-driven recruitment platform that automates resume parsing, conducts contextual live interviews, and produces weighted candidate rankings to support recruiter shortlisting decisions.

Stack: Next.js, TypeScript, Flask, Socket.IO, MongoDB, JWT, Groq API, Docker.

VyaparSeth — Smart Udhaar and Store Manager

Developed a Flutter and FastAPI business management app for Indian retail shops with customer udhaar tracking, billing, low-stock alerts, WhatsApp reminders, and AI-powered shop insights.

Stack: Flutter, Dart, Provider, Dio, FastAPI, MongoDB, JWT, Groq API, Flutter Secure Storage.

Intern Crawler — AI Internship Matching System

Built a resume-to-internship matching system using sentence-transformer embeddings and cosine similarity, with auto-crawl fallback logic, diagnostics, and a streamlined recommendation interface.

Stack: FastAPI, Python, MongoDB, Sentence-Transformers, Streamlit, Groq API.

CERTIFICATIONS

NVIDIA — Getting Started with AI on Jetson Nano	<i>Jan 2026</i>
CHARUSAT Cloud Clubs / AWS — Cloud Computing & AWS	<i>Dec 2025</i>
Coursera / Packt — Foundations of DSA & Algorithm Analysis	<i>Aug 2025</i>
Udemy — Complete Python Bootcamp	<i>Aug 2025</i>

HACKATHONS & EVENTS

Codeversity National Hackathon at IIT Gandhinagar	<i>Feb 2026</i>
AI Workshop at IIT Gandhinagar	<i>Feb 2026</i>
Tech-Tonic Hackathon at CHARUSAT	<i>Aug 2025</i>
Maverick Effect AI Challenge	<i>Aug 2025</i>
